

Lab 10: Managing Resources with Tagging

TWO SCREENSHOTS REQUIRED

1. After successfully completing **step 31**, take a screenshot of your command line. You should have on screen the results of the `aws ec2 describe-instances` command with filters that show the two development instances. If any of this is incorrect, please wait a few minutes, refresh the screen, and revisit the instructions.

2. After successfully completing **step 39**, take a screenshot of the command line showing the output that confirms instances were identified in US-EAST-1 and are being stopped. If any of this is incorrect, please revisit the instructions.
